

STANDARD BUBBLE ROLL

Bubble wrap is made in three standard types. Those three are 3/16" (small) 5/16" (medium) and 1/2" (large) bubble. Standard bubble rolls are 48" (4 ft) in width. These sizes refer to the height of the bubbles themselves.

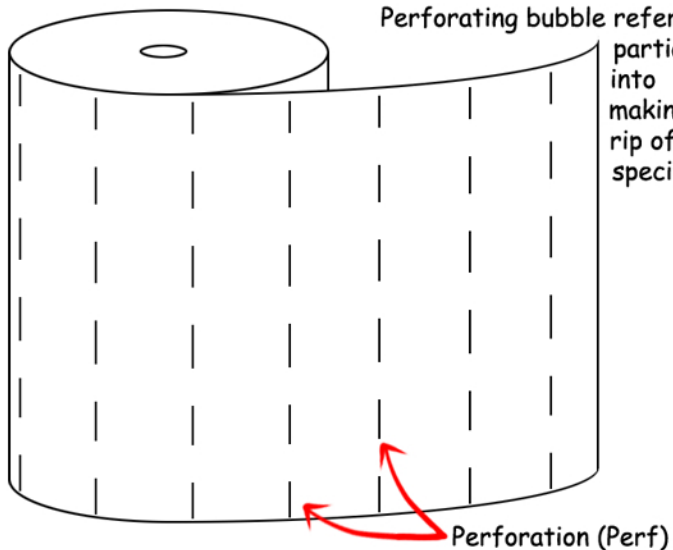

The length of each roll varies depending on which type of bubble. Small bubble has a length of 750 ft, medium bubble has a length of 375 ft and large bubble has a length of 250 ft.

BUBBLE PERFORATIONS

Perforating bubble refers to adding a partially cut line into the bubble making it easier to rip off by hand at specific lengths.

BUBBLE SLITTING

Slitting refers to cutting the bundle of bubble into smaller width rolls. A 48" bundle can be slit into 12" or 24" rolls evenly. Custom slit sizes are also available upon request.
